

DeFi Meets Gambling

A profitable casino chain with **160,000+** players is bridging gambling with advanced Web3 and DeFi infrastructure

PLAY. STAKE. EARN

The Problem: The Gap

Most crypto projects promise utility but lack real users or business fundamentals

Traditional gambling operates in isolation from blockchain and DeFi innovation

DeFi projects struggle to find product-market fit

Investors and community members need exposure to a market that grows regardless of crypto market conditions

The Solution: EMYO

Fusion between a proven, profitable gambling business and cutting-edge DeFi

160,000+ active players
(100k+ offline, 160k+ online)
across multiple continents
as day-one users

Powerful team
with 20+ years of
experience

\$600M+ annual gambling turnover — stable cash flow backing the token

DeFi infrastructure built specifically to reward casino players + attract crypto investors

Non-gamblers get full DeFi access without ever playing casino — zero gambling required

The Gambling Market: Recession-Proof & Expanding

\$250B+
Global Market Size

15-20%
Asia Pacific Growth (fastest)

8-10%
Annual Growth Rate

Resilient
Grows During Downturns

Gambling is the infrastructure people support no matter the economy.

Current Operations: Real Revenue, Real Players

100,000+

Offline Casino Players / Year (across continents)

160,000+

Online Casino Players / Year (across continents)

\$600M+

Annual Gambling Network Turnover

These are not projections. This is **proven, profitable infrastructure TODAY.**

Why EMYO Is a High-Potential Project

Backed by real, functioning casino business — not just plans and promises

160,000+ active users TODAY

\$600M+ annual business turnover — provides stable cash flow

Monthly bonus pool from casino profits distributed to token staking community

Casino players are token sale participants with long vesting — aligned incentives

Immune to crypto winter — gambling revenue is independent of market cycles

What is the Purpose of the Token Sale? Why Now?

- Token sale funds go **exclusively to building DeFi infrastructure**
- Creating the technological hub for a **decentralized entertainment economy**
- Integrating **transparent on-chain tracking** for gambling and rewards
- Expanding EMYO utility beyond the casino into **broader Web3 ecosystems**
- Building the DeFi mechanisms that will attract **millions of non-gamblers** to stake and earn

The Secret Weapon: Monthly Bonus Pool ✨

- Casino chain creates a **monthly bonus pool** from gambling profits
- Pool is **distributed to all EMYO stakers** as rewards
- Pool grows every month as casino business scales — **automatic buy pressure on token**
- As DeFi ecosystem grows → more players stake → more casino revenue → bigger pool → stronger incentives
- This is **not a yield farm** — this is real gambling revenue flowing to token holders

This is the mechanism that makes EMYO different: it's backed by real business economics.

The Team: Gambling Mastery + Crypto Innovation

LEVAN KORKASHVILI
emyio ceo
ceo of bvi entity
ceo of eclipse casino

KARIMI HJIGINA
marketing & community
lead / head of marketing
at moyo casino

MIKHAIL PRILEPKO
token sale director head
of online casino chain

ANDRIS KRUTE
tokenomics & product
lead head of slot
department at eclipse
casino

OLEG KIM
operations &
compliance manager
head of online
operations

Why This Team Cannot Fail

Gambling & Casino Division:

- General Director of the biggest offline casino in Georgia — 10+ years building profitable gambling enterprises
- Top casino chain management — infrastructure, operations, product expansion

Advisors

RYAN HORN

strategic partnerships
advisor (vc & exchanges)
ex binance director,
crypto expert

ADAM JONES

global marketing
strategy advisor
global marketing
strategist with 15+
years of experience for
leading us brands

IGOR KARAVAEV

chief strategy &
tokenization advisor
ex-skolkovo foundation
executive director,
fundraising consultant

Powerful combination:
they've already
succeeded in gambling
and crypto. Now they're
bridging that operational
excellence to create the
Casino 3.0 ecosystem.

Mission & Vision

Mission

Bring DeFi access to every player and merge decentralized finance with real-world profitability — building a gambling economy that benefits users, investors, and operators.

Vision

Create a transparent, rewarding, self-sustaining ecosystem where DeFi meets proven, revenue-generating business. Every participant contributes to and gains from EMYO's growth.

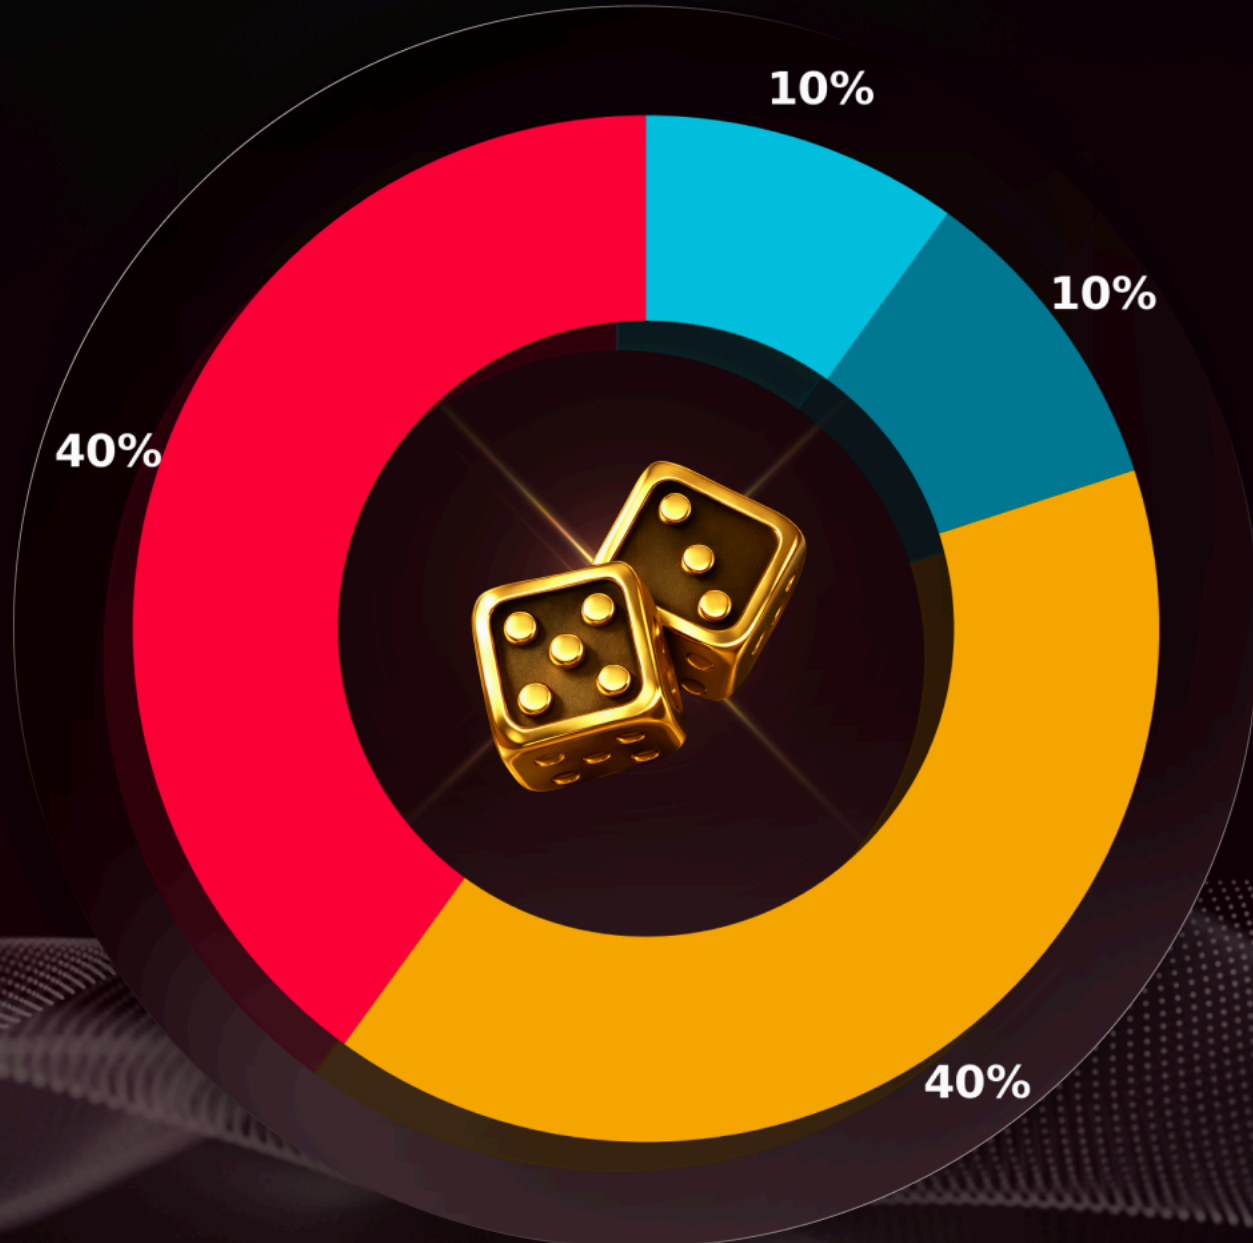

DeFi Infrastructure: The Growth Engine

- **Staking Rewards** — Earn passive income on EMYO holdings from casino bonus pool
- **Liquidity Mining** — Provide liquidity, earn fees and tokens
- **Governance DAO** — Community votes on ecosystem proposals
- **On-Chain Tracking** — Transparent, blockchain-verified gambling and reward operations
- **Multi-Chain Integration** — Access to broader Web3 ecosystems beyond gambling
- **For Non-Gamblers** — Full DeFi access, zero gambling required. Stake, earn, participate without ever playing

\$9.5M

Token Sale: \$9.5M Allocation

40% | **DeFi Infrastructure Development** — smart contracts, on-chain architecture, yield mechanisms

40% | **Ecosystem Growth & Marketing** — user acquisition, partnerships, community building

10% | **Liquidity & Market Making** — ensure token liquidity post-launch

10% | **Team Expansion (Crypto Specialists)** — developers, architects, blockchain engineers

Risk Mitigation: Why EMYO Is Safer Than Most Crypto Projects

- **Crypto market crashes?** Gambling revenue continues unaffected. Casino business is recession-proof.
- **Regulations tighten?** Casino chain is licensed and compliant in multiple jurisdictions.
- **Team expertise?** EMYO team has already succeeded in gambling and crypto. Casino 3.0 is the next step.
- **User adoption slow?** 260,000 players are already in the ecosystem from Day 1.
- **Token liquidity issues?** Real business generates daily cash flow. Monthly bonus pool is real capital.
- **Market downturn?** Gambling market grows during recessions. EMYO is counter-cyclical to crypto volatility.

This is not a plan for the future. This is an already profitable business, adding DeFi as the next step.

2026 Roadmap: From Token Sale to Ecosystem

Year 1 (Q1-Q2 2026)

1

- DeFi infrastructure launch
- EMYO staking integration into casino platforms
- First monthly bonus pool distribution

Year 2 (Q3-Q4 2026)

2

- Expand to multi-chain deployment
- Launch governance DAO
- 50%+ user base growth

Year 3 (2027+)

3

- DeFi revenues complement gaming revenue
- Become model for gambling + DeFi integration globally

Don't Miss the Next Global Trend

- 20+ years of experience on the market
- Early-stage token access to an ecosystem with **160,000+** active players TODAY
- Monthly passive income from real gambling profits (not token inflation)
- DeFi infrastructure backed by \$600M+ annual business turnover
- Position yourself in the market merging DeFi and gambling at scale

Where DeFi meets profitable real-world business
